Phase I - Project launch

Major achievements to date

Phase I - Project launch

Spartacus is the largest decentralized reserve currency protocol on Fantom network based on SPA token, which is backed by a basket of assets (Dai, SPA-DAI LP tokens etc). The backing assets provide an intrinsic value for SPA tokens.

Spartacus was launched as an OHM fork on Fantom, by a team of anon devs.

Oct 25, 2021 - Spartacus discord was created, the warmup phase for the fair launch.

Oct 31, 2021 - Liquidity Bootstrap Event (LBE) raised \$300K Dai from 500 wallets at a price of 10 Dai/SPA. The LBE lasts for an hour.

- 140K Dai and 70 SPA were added to Spookyswap to provide liquidity at 20 Dai/SPA. All SLP tokens were bonded into treasury.
- 60K Dai was bonded into treasury
- 100K Dai was allocated for initial development work.

Nov 2, 2021 - Spartacus officially launched with (Λ, Λ), bonding, staking, and a full blown dashboard, the only treasury reserve protocols with all full metrics.

SPA was listed on coinmarketcap and coingecko within first 2 days
